

Sustainability Excellence Job Description Web Developer

Sustainability Excellence is looking to hire an ambitious **Full Stack Web Developer** who can work on web platforms that are used by thousands of people.

We are a medium-sized company with offices in Amman, Doha, and Abu Dhabi, pioneering social and environmental sustainability in the region. We help businesses and government agencies become more sustainable, and we help investors assess the sustainability performance of companies

Experience Required:

- Bachelor or MSc degree with emphasis in one of the following disciplines preferred: Information Systems, Software engineering, Computer Science, Machine Learning, Finance, Economics, Statistics, Mathematics, or related analytical discipline.
- Ideal candidates would have around 2-3 years of hands-on experience working in web development.
- Strong experience in PHP and MySQL is required.
- Experience with source control (git) and working collaboratively on software projects is preferred.
- Experience in CakePHP or Laravel frameworks is preferred but not required.
- Knowledge in data analytics, big data management, and scraping algorithms is a plus
- Passion for good design and coding practices and a desire to develop bold new ideas.
- You are necessarily fluent in English with the ability to draft user friendly documentation

Location:

The position is based in Amman, Jordan

Main Tasks:

- Add features to our existing web platforms using MVC frameworks; currently CakePHP and Laravel.
- Work on complex data analysis projects, which include creating and working with databases, utilizing graphing software, and automated report generation.
- Plan and implement new projects for internal use and for our clients. This includes conducting user interviews, selecting the most suitable technologies for the project, system architecture design, implementation, testing, and maintenance.

SUSTAINABILITY EXCELLENCE

- Write code specifications, technical design documents, and technical documentation.

Skills Required:

- Ability to create web applications and components from the requirements stage, through design, production, and deployment.
- Ability to design functional and thoughtful dashboards from a user experience perspective; passionate to create an attractive, enjoyable and friendly *journey* for users.
- Can-do attitude and willingness and ability to learn quickly.
- Ability to work effectively both independently and within a team.
- Working with a variety of information systems and data files, including large and complex files: analyzing file structure, using and creating file layouts, transforming specific raw data into finished products.
- Excellent project management skills with the ability to manage multiple projects effectively, maintain project plans.

Language Proficiency:

- Fluency in English – reading, speaking, writing
- Fluency in Arabic - reading, speaking, writing – is an asset
